H. Shrivastav and E. Kongar, "Information Overload in Organization: Impact on Decision Making and Influencing Strategies," *2021 IEEE Technology & Engineering Management Conference - Europe (TEMSCON-EUR)*, Dubrovnik, Croatia, 2021, pp. 1-5, doi: 10.1109/TEMSCON-EUR52034.2021.9488649.

The article “Information Overload in Organization: Impact on Decision Making and Influencing Strategies” discusses a study that looks into how information overload impacts organizations. The study involved a questionnaire given to employees of technology companies. The results will be analyzed quantitatively. The article also lists strategies that organizations can use to manage information.

The article is relevant because it discusses how information overload can impact decisions in organizations. Also, the article lists how companies can manage the problem.
